Vehicle Offer: UAZ 2363 Pickup

Basic Technical Description

The Double Cab's closed bodywork is mounted on a flexible steel ladder frame. The vehicle's fundamental competitive advantage is in the solid axles that assure durability, a long lifespan and minimal maintenance costs. The rear axle uses leaf springs to provide a higher payload, while the front axle provides driving comfort with coil spring suspension. The rear platform is separated from the body, which significantly increases off-road capabilities. The vehicle frame better adapts to driving conditions by torsion.
